This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

amicable composition or agreement of a suit, either actual or fictitious, by leave of the King or his justices, whereby the lands in question become, or are acknowledged to be, the right of one of the parties. In its original it was founded on an actual suit commenced at law for the recovery of the possession of land or other hereditaments; and the possession thus gained by such composition was found to be so sure and effectual that fictitious actions were, and continue to be, every day commenced for the sake of obtaining the same security." This device is one of the oldest known to the law, and the records of fines have been regularly preserved since the reign of Richard I. to the date of their abolition by statute 3 and 4 William IV. c. 74, which substituted for them deeds enrolled in the Court of Chancery. The practise, owing to the important nature of the conveyance, has from time to time been regulated by statute, mostly to obtain the greatest amount of publicity possible for the transaction, for unless fines were protested within a year and a day, or afterwards within five years, they were absolute. After the reign of Henry VII. a tenant-in-tail could bar his issue by a fine.

In the Record Office are *Books of Entries of the Fines*, from which Sir Thomas Phillipps's list seems to have been pretty directly taken, and in which the fines are arranged according to the terms of the legal year. Those fines which relate to property in more than one county are placed at the beginning of the list for the term, while those for cities, such as the City of Worcester, occur all together under the separate head of "Civitas."

In fines the plaintiffs are persons to whom the right of property is to be conveyed, and the defendants are those who are about to part with the property; and they contain a description of the estate, and the name of the locality in which it is situated. The Committee of Public Records of the House of Commons, in speaking of fines, states, "The utility of these Records to all persons desirous of tracing property and pedigree is unquestionable;" while to a proper construction of a County History they are indispensable.

INTRODUCTION.

THE original of this book is among the purchases made at the sale of a portion of the late Sir Thomas Phillipps's Library in the summer of 1896 for the Worcestershire Historical Library. The title-page of the original runs thus ;—Index | to the | Pedes Finium | for | Worcestershire. | Impensis Dni. Thomæ Phillipps, Bart. | Ex | Zincographia | Appelana. | 1853. The work contains a list of the Fines for the County and City of Worcester from the first year of Charles II. (1649) to the end of the reign of Anne. Nothing is known of it at the British Museum, but it is probably the book mentioned in Sims's *Manual for the Genealogist*, p. 133, as having been printed for private circulation by Sir Thomas Phillipps, Bart.

By whom the MS. was made of which the book is a lithographed, or rather zincographed, copy is not known. Appel, it is supposed, was a German by whom the process of zincography was practised, a process which consisted in writing with a prepared pencil on very thin prepared paper, and transferring the work to a plate of zinc, from which it was printed. It entailed considerable difficulty, but the result in the present case is very clear, and the writing is good. The numerous contractions it contains have been expanded in the printed book, which it is hoped, with this exception, is an accurate copy of the original, even to the very evident misspellings of names of persons and places which frequently occur, but which will be patent to any student of Worcestershire History. It must be remembered that the book is an Index only to the Fines, and does not profess to contain in any sense full abstracts of them. The consultation of them at the Record Office will reveal many names covered in the list by the words "alios" and "aliis," and possibly much information of which there is no indication at all.

Fines, or Feet of Fines, are practically deeds conveying land, though in fact they are "fines," the endings, or "pedes finium," the last clauses of endings (a phrase a little tautological) of suits at law. Blackstone says, "A fine may be described to be an

AN INDEX

TO

WORCESTERSHIRE FINES, 1649—1714.

INDEX OF PERSONS AND PLACES.

NAMES occurring more than once in a page, whether as names of persons or of places, are indexed only once.

Evident misspellings are indexed as rightly spelled. Names nearly certainly referring to the same family or place are grouped together. In cases where there is more doubt, and in some other instances, the spelling is given in the Index as it occurs in the text.

CLENT, *July*, 1897. J. A.

ABBERLEY, 49, 144, 211, 277, 356, 379, 423
